NATURAL HIGH is the third iteration of the HAPPY MIND exhibition series; each of which considers the presence of a seemingly contradictory stability or consistency within the midst of extreme psychological duress.

Though on a whole awkward or uncomfortable in form, the exhibition ultimately revels in an openness born of optimism and a mode of expression - though put together piecemeal - particular to Japan.

We would like to thank our colleagues for their kind collaboration in the realization of this exhibition : Galería Agustina Ferreyra, XYZ Collective, Hauser & Wirth and Brennan & Griffin
