

Dear Visitor,

Welcome to a collection of playgrounds where creativity is limitless and experimentation is the norm. ON! is an interactive experience – you are player, tinkerer, maker and collaborator. In this exhibition you will encounter some of the world's brightest minds exploring design and technology. Using code and circuitry as adeptly as paper, ink and canvas, these artists personify the new reality of creative production today: genre-bending ingenuity at its most fun.

These are playgrounds after all—so game on. Now let's play!

*ON! Handcrafted Digital Playgrounds* is organized by the Contemporary Arts Center and curated by Héctor Ayuso. Ayuso is the founder of OFFF, an annual creative festival based in Barcelona, Spain. Since its inception over a decade ago, OFFF has produced an international network of artists and designers who have a passion for sharing their work and inspiration. ON! is the first museum exhibition to tap into this global network.
