

## **FOREVER FEVER**

### **LILI HUSTON-HERTERICH**

**07.05 - 06.06 2021**

Lili Huston-Herterich is presenting an exhibition of large-scale black & white photographic collages made with negatives from her personal archive, combining photographs she made but never printed when she first learned to use an analog camera.

This past Tuesday, Lili was live on Worm Radio. She played music she listened to in the darkroom when she was making the negatives she is printing for Forever Fever, and speaks a bit about what she's been thinking about while in residence in the darkroom at Peach this month.
