Rumpelstiltskin

I had a question about some side effects. After charging the sigil I feel very lethargic and heavy, and I can literally feel energy pulsing throughout my body – is that normal? I just want to make sure I'm doing everything safely and to the best of my abilities.¹

Write the sentence "Matter has a heartbeat" and let it be a guide for rethinking thought's air supply.

Make a word balloon for the social atmosphere of a smell or a texture or the way a shoulder twitched. Then conjure its world.²

<p>To be down down look for the grownd. Help me look help me go to the edge. Yes it is lovely here on the edge. I want to go to the edge frequently. It is keeping the ground growing now more nothing. How to take nothing.³</p>
