EAST HAMPTON, N.Y. — Halsey McKay Gallery is pleased to present *Windows*, a solo exhibition by Denise Kupferschmidt, on view from June 4 to July 4, 2022. In *Windows*, her fifth solo show with the gallery, Denise Kupferschmidt uses the morphing light and repeated geometric forms of her urban landscape to present a colorful evocation of the passage of time. During quarantine her landscape paintings added another layer of detachment, that of being inside looking out through a window, as so many of us were stuck doing. Kupferschmidt playfully evokes the window itself, in a series of paintings that capture the familiar while resisting the banal. The consistent rectangular skyline of these works emphasizes an isolated perspective. Nevertheless, the view from the window(s) is constantly changing — reflecting how prolonged observation and thought provides new insights on a space. The color palettes are inspired by ominous pictures of skies during recent wildfires, hurricanes and tornadoes as well as more joyous skies as seen on a road trip taken around the US. Ultimately, Kupferschmidt's *Windows* reflect her own perceptions of the sky as she contemplates climate change and the future.
