

Susi Gelb
LOOPZRING

October 07 – November 05, 2022

What binds the natural and the artificial worlds is a thin interwoven string of artistic exploration found in Susi Gelb's exhibition LOOPZRING. Equipped with a fascination for scientific boundaries and discoveries, Susi enters a visual dialogue with the likes of Fibonacci and Mandelbrot, and just like a deep train of thought, she pulls us into her artistic cosmos. Spinning vortexes, spiralling flora, and whirling water, whizzing particles, and a drilling apparatus - the oscillating pull of our endless universe, l'appel du vide.
