

Wyatt Niehaus:
AFTER THE GOLD RUSH

November 11, 2023–
January 19, 2024

This picture can be supplemented by a chart showing the areas which have more than twenty inches of rainfall per year. This figure represents, roughly, the minimum amount of rain necessary for the effective production of wheat and rice, the great food staples [...]. The actual distribution of the centers of wheat and rice production in the world can be seen to coincide fairly accurately with the areas of adequate rainfall. A temperate climate and rainfall adequate to the production of either wheat or rice provide the agricultural basis for the power of any state. A region which lacks these elements in any appreciable degree finds itself doomed to play a secondary role in the power relations of the world.

Quality for you

地球環境を考えながら、走りを愉しむ。

それは、今という時代にメインストリームとなっている考え方です。

シビックフェリオは「平成17年排出ガス基準50%低減レベル」認定を受けた、優れた環境性能を持つ1.7ℓエンジンがメインパワープラント。

高品質なクルマに、優れた環境性能を。

いつまでもスタイリッシュに走り続ける喜びを、フォーユー。

★ CIVIC FERIO

Since coal and iron represent the basic energy and material requirements of our machines, the distribution of the world resources of these elements and the distribution of their centers of production are all part of our picture.
