

Formula:Marionette

TARGET/CLOCK

7 sequences

The TARGET/CLOCK was an element in the work Formula:Marionette performed in the private London home of Sarah Elson in January 2014.

TARGET/CLOCK has seven different daily sequences which are formed over the course of a week by the activator. They sequences can be reactivated at other times but the arrangements defined in the following pages need to be strictly adhered to.

During the installation of each sequence a specific armband relating to a day in the week needs to worm by the activator.

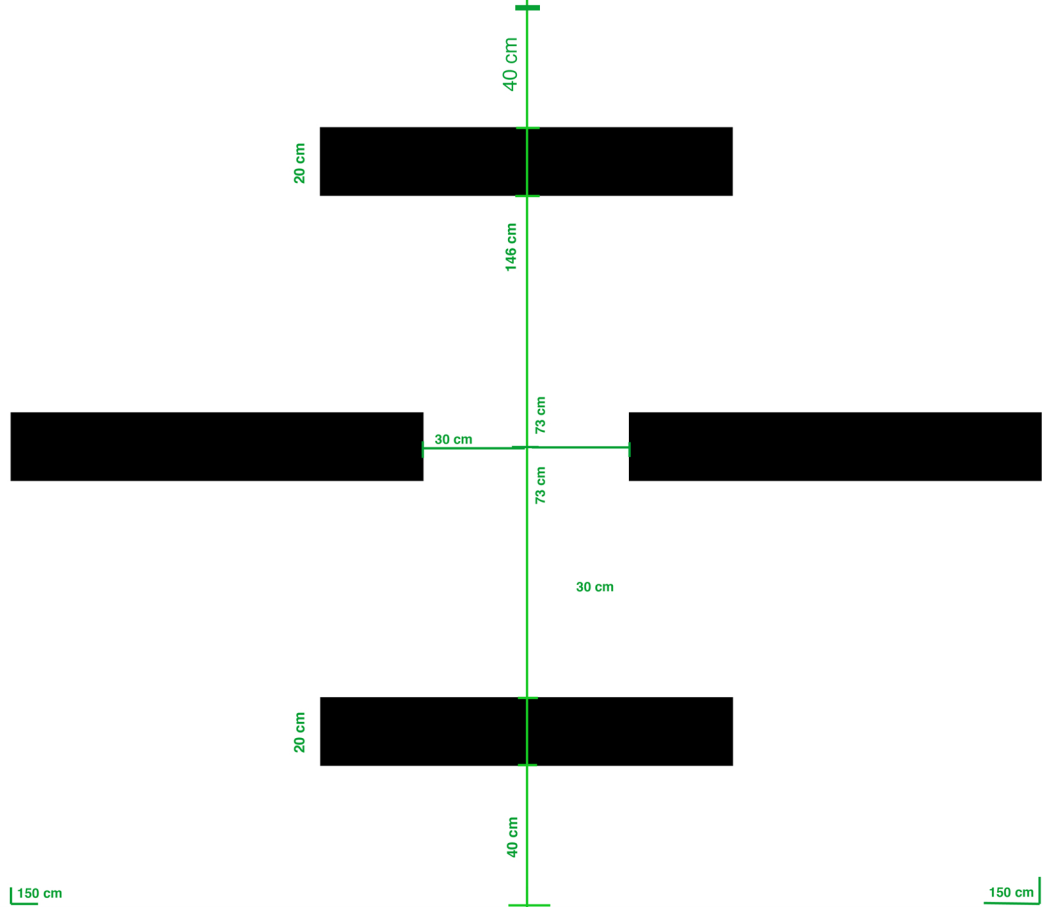

Instructions on installation and information on the the Picturevocabularies are listed below.
