**R. Sebastian Schachinger –  
Der sichere Steinwurf lernt sich das durch das Ballspiel**

Curated by Mario Kreuzberg

R. Sebastian Schachingers practice deals with the immaterial presence of the past. The traces of our experiences are erased hundreds of times and overwritten by new ones. The objects he works with and creates are overloaded with his biography through different mediums such as large-scale installations, sculpture, sound, and performance. He tries to understand what role these physical relics play in self-identification and how their material uniqueness relates to our idea of them, engaging in duality and repetition.

Schachinger will do a site-specific installation in the Watertank at City SALTS.

2022 R. Sebastian Schachinger was awarded the Kiefer | Hablitzel Göhner Prize. Since 2023 he is running project space RUF in Vienna.
