Alizarin (Terrorists are made, not born), Postcard, 2024

Installed in any direction

7

**Cameron Rowland**

*U20E*, 2013

Steel with standard finish

18.5 x 1.875 x 2.5 inches (46.99 x 4.76 x 6.35 cm)

Corporate franchised stores have shelving equipment manufactured for their needs. When this franchise moves or upgrades, their equipment is then sold to a resale warehouse which in turn resells the equipment to a smaller store, selling and buying back from them many times over different components of that shelving system. U20E is an extension device, meant to modify an already existing shelving unit. It had been painted black by a previous owner, to have proxy matched the rest of its components.
