

GEORGIE NETTELL  
Isn't It Beautiful  
November 17 – December 21, 2024

\*\*\*\*\*

Markets are defined by uncertainty. This is why at Jane Street we specialize in managing risk. We carefully study how trading risks might be bigger or more interrelated than they appear, and this allows us to be especially bold. We build bridges between supply and demand, across space and time, to make the world's financial markets more efficient and transparent.

We provide liquidity in even the most complex and difficult-to-navigate markets, exploring the latest theory and pushing beyond existing performance limits. Our global presence allows us to trade continuously on more than 200 electronic exchanges, making us one of the world's largest market makers.

Jane Street has grown every year in its team, capital, and global presence. Combining machine learning, distributed systems, programmable hardware and statistics with a deep, human understanding of the market universe, our traders and researchers work hand in hand with our technology teams to build critical systems through which billions of dollars worth of transactions flow every day. So, whether it's in New York, London, Hong Kong, Singapore, or Amsterdam, standing on a Jane Street trading floor feels like being at the center of something much, much bigger.
