Shamadhi

Subject to change

opening: Saturday August 23, 5—8pm

August 23—August 25, 2025

————— wants to appear. Though no place in particular is necessary, it will fill up what it's given. If you faint out of shock, it will overgrow the room, pressing you to the walls, absorbing all of you and so too the room. It will move on, hoping, and ask someone else: "paint me". They too may faint, moving in as your neighbor; absorbed. This continues until the entire world knows nothing of —————, all the while living inside its belly.

Still, the body happens here; develops habits, attempts to navigate, plans are made. What is the fastest route from A to B? These are the models for every motion, and the motion meets you with no resistance. It should feel sore, but it doesn't. A gets to B, and B gets to hours and hours of waiting in an untraceable place.

The date has changed so many times, because of life and living and disappointments and sadnesses and happy tears and etc. *Well, you have to understand and accept that instability is the new norm.*
