

# CHASE SCENE

---

OCEAN EARTH DEVELOPMENT CORPORATION

“CHASE SCENE” PAPER STOCK PIECE  
NUMBER OF SHARES TO BE OBTAINED UPON EXCHANGE

---

IN EITHER THE MONTENEGRO (\$500,000) OR WELLINGTON (\$300,000) PROJECTS

On the reverse side, a view of the world from the standpoint of the seas, flowing over the lower parts of the earth's crust in a circulatory system centered on a swirl around a central, upsurged collision of crust: Antarctica. Four basins are flung from there on out: the Atlantic/Arctic, a north-south pump; the Pacific; the Indian Ocean; and, further off, the interior basins of Eurasia. Within this oceanic game board, the art/architecture firm Ocean Earth races to find sites for development of fuel-cell or pure-combustion fuels, such as hydrogen or methane, from where the world's nutrients and sunlight most productively converge: in ocean waters, embodied in marine algae. We work to replace the far more dangerous sources of primary power: fossil-life residues, nuclear minerals and hydroelectric. Where, here on this earth, shall we prevail against competitors? Chase Scene.
