

NOTABLE EXCERPTS FROM NEWS FOOTAGE
OF BOTH ZAGREB AND BELGRADE TV

TIME CODE	SUBJECT
1:40	High tension and precaution, with alert eyes in all directions, as security agents leave entrance of presidential palace.
1:37:07	Apparent bullet holes, or possibly pockmarks from grenades, on walls.
1:37:16	Roof damage, without burning of wood, evidently more the result of blast than of incoming rocket, in area of parked cars. Relation to parked limo?
1:35	Aspects of damage in the interior courtyard, clearly cut off from exterior. Direction of blast does not suggest any trajectory of incoming missiles or even bombs.
1:36:41	BMW limousine, evidently to be used by Tudjman. Some confusion about whether this should be revealed or not.
1:38:54	Chandelier collapse on center table; rather neat, not clearly related to blast. This and other interior damage within the executive suite seems to have been done by hand. Note the curtains, how they are ripped off the walls. It is not clear that a bomb blast in the court would cause this.
1:32:16	Aircraft bombing and effects, quite different from what appears inside the palace.
1:39:25	Roof, blown away by blast from below, not pierced or burned.
1:39:41	Smoke marks on walls in interior of courtyard.
1:37:11	Interior damage, in a corner of the court.
